

## PRODUCT DATA SHEET

Product ID           RGH2  
Description:         Front and Rear D Harness

Accredited to:     EN 361: 2002  
Web material:      45mm water repellent polyester  
Fittings:           High tensile steel alloy  
Weight:            1.15kg  
Features:           • Front and rear attachment points  
                      • Fully adjustable  
                      • Rip stitch indicators  
Sizes:              Small, Standard, Large and X-Large  
                      Please refer to the harness size guide

The RGH2 harness is the 'workhorse' of the industry. The harness is fitted with a rear D attachment and a chest-mounted front D.

- It can be used in a similar way to the RGH1, but has the added feature of the front D ring to extend its working capability.
- Using the front D, the harness can be fitted with a rope and grab system (RGA12) for vertical fall protection when an operative is making repeated ascents.
- Can also be used when restraint is needed in either the vertical or horizontal plane.
- A variety of other devices can be used with the front D ring, but check for suitability.
- The ring connection between the chest and shoulder straps ensures no stress loading when force is applied to the front D ring.
